SIEMENS

Our purpose

We create **technology** to transform the everyday, for **everyone**

Unrestricted | © Siemens 2024 | February 2024

SIEMENS

"

Digitalization is transforming the backbone of our economies:

Industry, infrastructure, mobility, and healthcare.

This transformation is key to business success and for shaping a sustainable future.

With our technologies, we're helping our customers to accelerate their own digital transformation, to reinvent their companies and industries, to become more sustainable.

Dr. Roland Busch
President and CEO of Siemens AG

Our four strategic priorities

Customer impact

We anticipate what our customers need before they even know they need it.

Technology with purpose

Innovative technology has been at the core of Siemens for more than 170 years and it will remain at the core of the future we're building.

Empowered people

Driving progress by empowering our customers, partners and employees.

Growth mindset

Rather than make yesterday last, we are committed to building tomorrow – by learning and being open to change.

SIEMENS

Siemens Xcelerator
The open digital business platform

Accelerating your digital transformation
Easier, faster and at scale

SIEMENS

Accelerate your digital transformation based on three-pillar

Portfolio

A curated, modular portfolio that includes digital and IoT-enabled offerings from Siemens and 3rd parties

Ecosystem

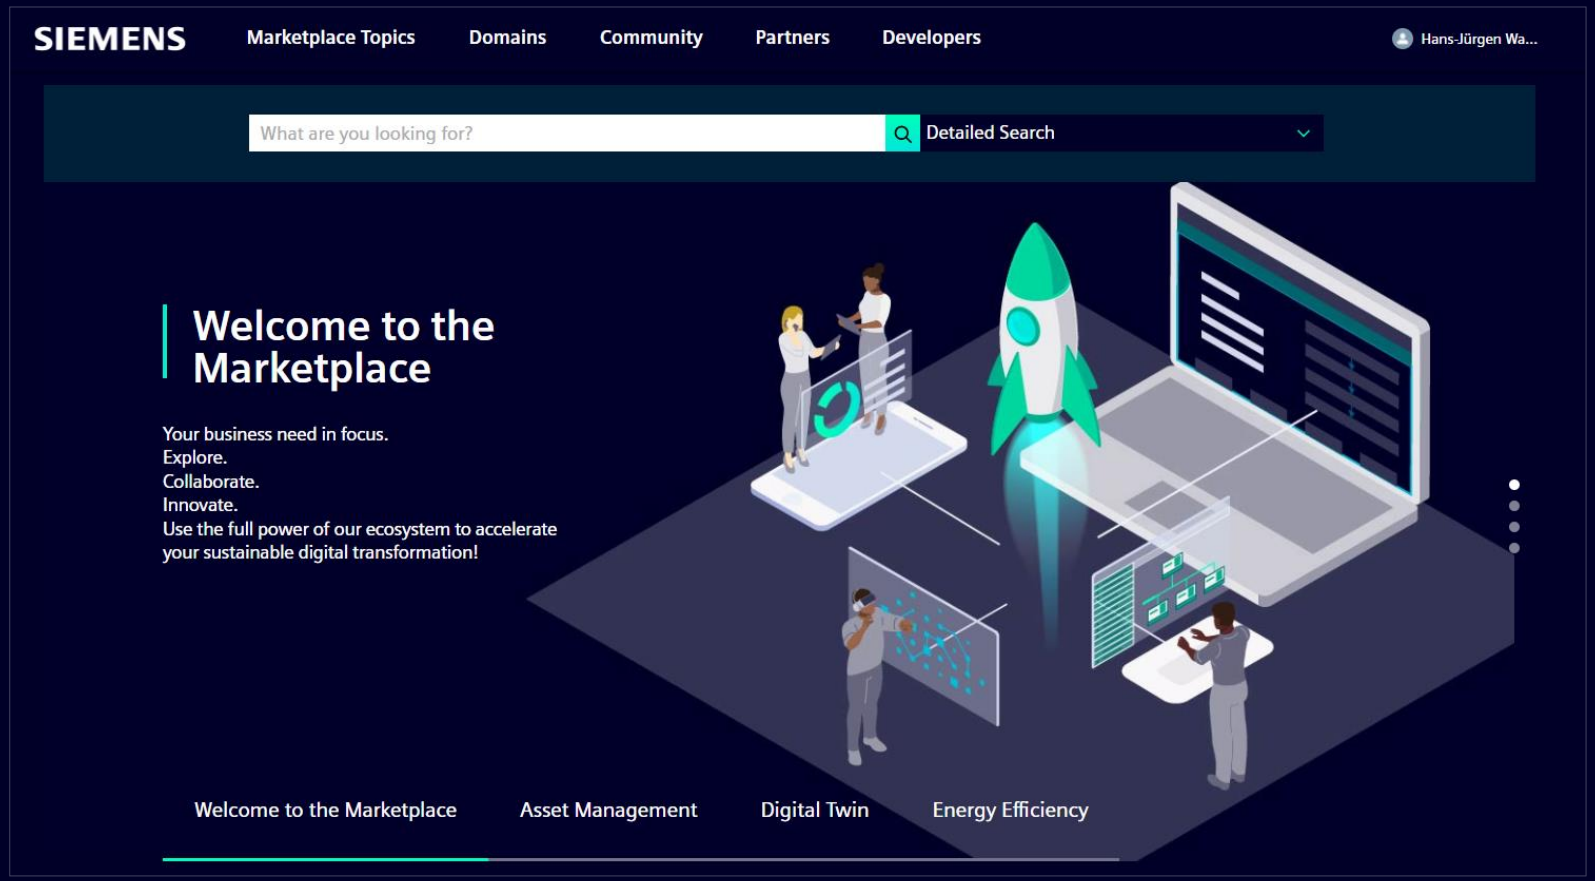
A continuously growing, powerful ecosystem between customers, Siemens and certified partners

Marketplace

A marketplace to explore and educate portfolio and ecosystem of partners

SIEMENS

The Marketplace makes your life easier by putting everything you need at your fingertip



Learn
what technologies can help to fix your business problem for specific industries or applications

Find
all offerings also from 3rd party at your fingertip

Exchange
with a community of specialist around the world to find answers for your business problem

Buy[1]

SIEMENS

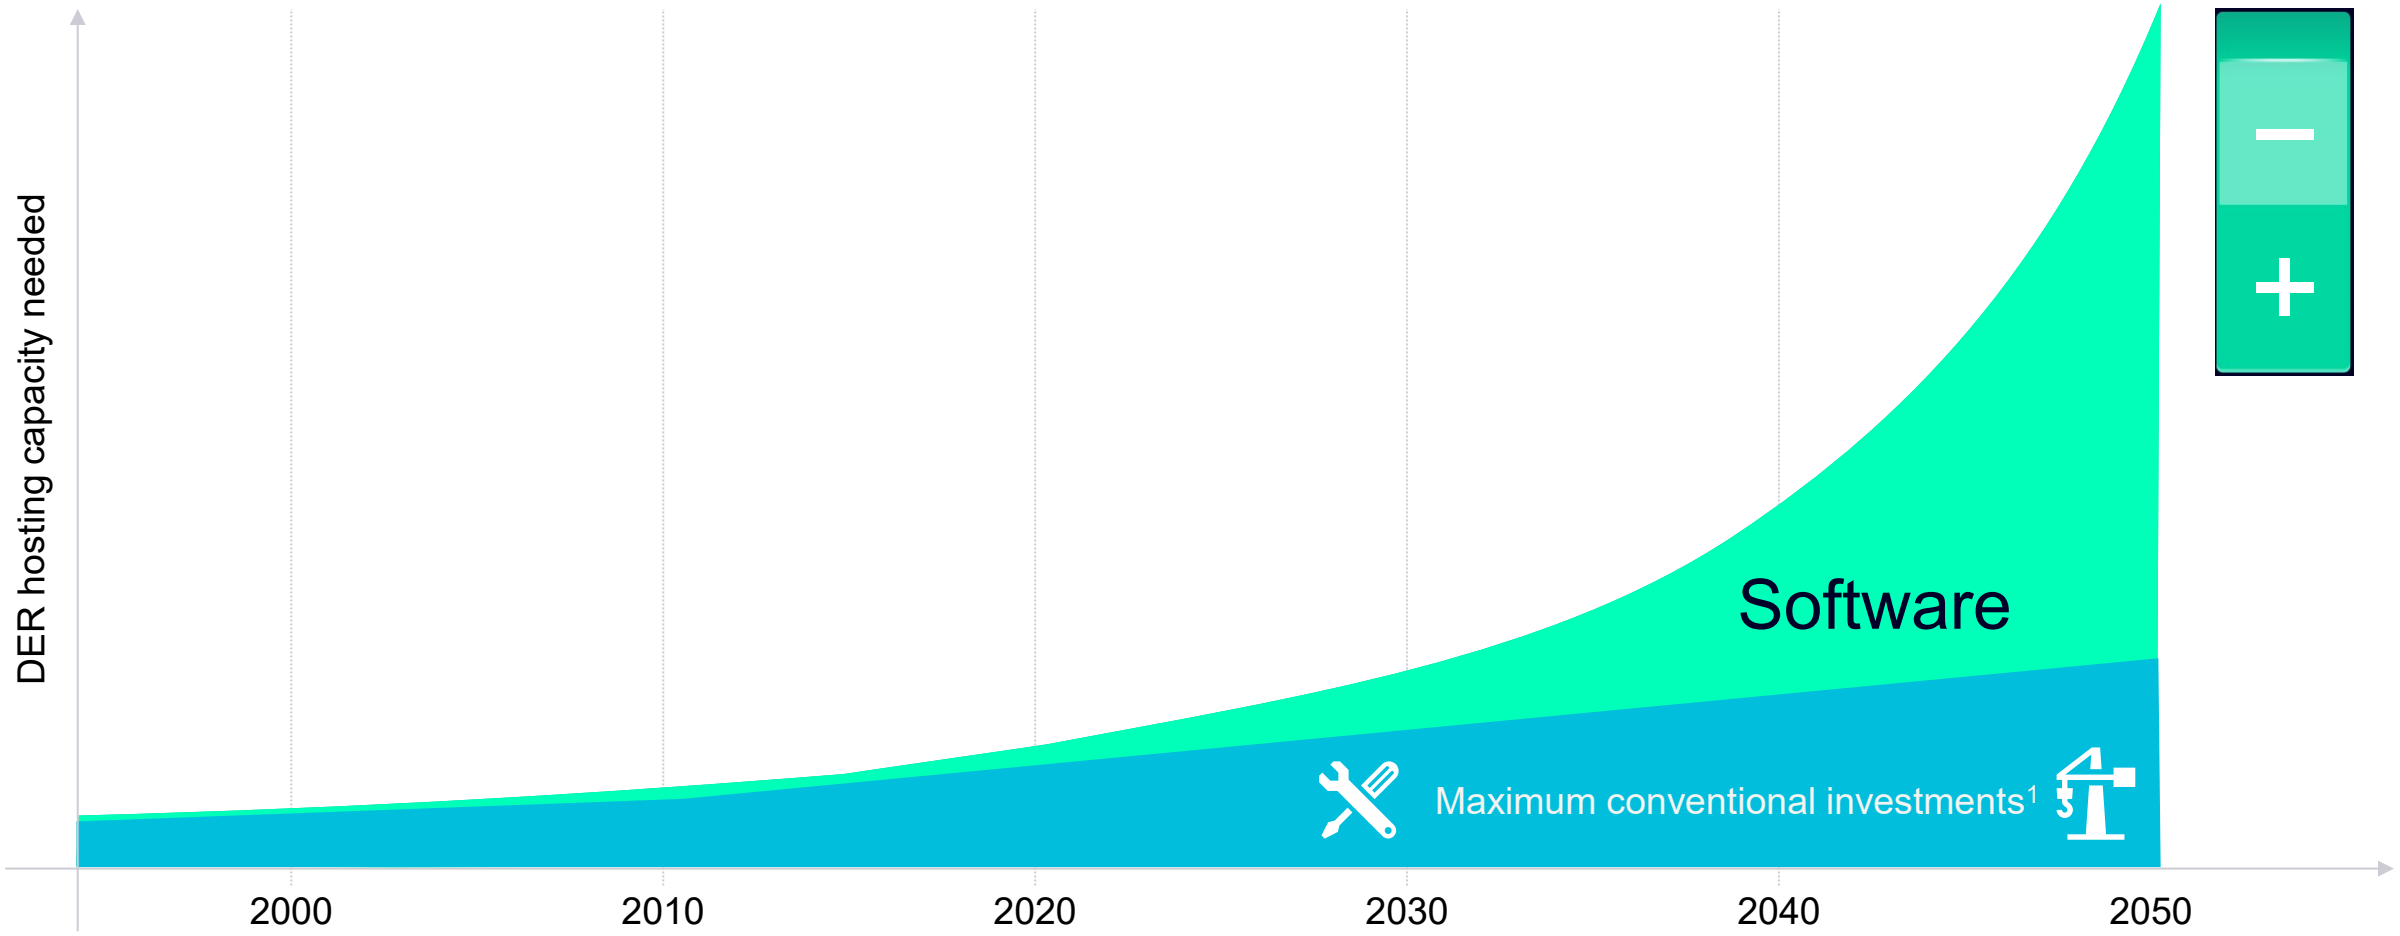
DER development and Hosting Capacity
#FlipTheSwitch



1 limited by resource availability, coordination effort, space, acceptance, etc.

Our customers are rethinking their IT/OT landscape
to solve their challenges

1

Operations
Closer to grid limits
Many manual daily tasks, missing transparency of low voltage grid, new regulations (power quality, SAIDI/SAIFI, flexibility markets), congestions and voltage problems

2

Planning
Expected increase of DERs
More DER connection requests, Capacity-driven planning, Identification of bottlenecks, Difficult forecasting due to reverse infeed

3

Field Crews
Missing transparency
Tedious fault location and restoration, inconsistent information about switching status, planned work and maintenance

4

LV Digitalization
Manage hardware roll-out
Roll-out of smart meters, Installation and commissioning of instrumentation in LV, Missing insights for planning

5

Analytics & Reporting
Data silos
Consolidation of business and operational data to retrieve insights for decision taking, while keeping cybersecurity in focus

SIEMENS

Gemini – our 4 strategic objectives

Gemini: The new strategy for Software and Grid Control.

Gemini is about embracing the challenge of DER growth for our customers. Our Gemini strategy focusses on aligning our product and service portfolio to deliver truly unique value to our customers.

This is a journey; come along and let's jointly create the World's Leading Grid Software Company!

Leading
We make our customers incredibly successful in leading the energy transition

Grid
We are constantly releasing fireworks of scalable innovations to manage DER growth

Software
We triple our software revenue

Company
It is inspiring to work with us

SIEMENS

Gridscale X™

Digital transformation easier, faster, and at scale

Enabling grid operators to **scale grid capacity**, scale **DERs**, and scale **customer satisfaction** fast

- Reliably operate grids **closer to physical limits**
- Make the most of the **grid flexibility** through DERs
- Make **data driven investment** decisions; yielding the highest returns

paving the way for **autonomous grid management.**

My Growth - Learning

"In a period of rapid change and increasing complexity, the winners are going to be the people who can learn faster than the rate of change and faster than their competition."

Tom Hood, CEO, Business Learning Institute (BLI)

At the beginning of a new year, we often set goals for ourselves.
For example, we commonly challenge ourselves to improve our health by doing more physical exercise, like walking.
And what do we do if we want to measure how far we've walked and how much progress we've made?
We count our steps of course. Similarly, if we set a goal to sharpen our skills, knowledge and expertise through more learning, then we also want to know what we've achieved.

With the introduction of Siemens Learning Hours you can keep track of the courses you've completed and the total number of hours you've invested in learning.

Learning:

- My Learning World
- Strengthscope (get your report!)

- My Community Learning
  By adding MyCommunityLearning.hr@siemens.com to meetings that have learning content, the hours of the meeting are automatically reported to GLP 2.0 (Global Learning Platform)
